EXPERIENCE

Rauxa / FKA — *Front End Web Developer*

NOVEMBER 2021 - PRESENT

- Currently leading projects using HTML, CSS, JavaScript Front end templates and responsive interfaces based on Design.
- Working with designers, creative teams, project managers, and client teams for project requirements and reviews.
- Working closely with Drupal CMS and facilitating back end integrations.
- Developing landing pages utilizing Adobe Marketo Engage.
- Providing Mentorship and guidance to Junior developers.
- Presenting and demoing work to large audiences.

Genuine Interactive — *Front End Web Developer*

JANUARY 2019 - NOVEMBER 2021

- Developed HTML, CSS, JavaScript Front end templates and responsive interfaces based on Design.
- Worked with designers, project managers, clients, and marketing team on a daily basis in order to meet weekly goals.
- Lead Front End Developer on several different client projects.
- Constantly contributed to custom Frontend framework/software for Drupal CMS back end integrations.
- Experience with writing ADA compliant code while adhering to company and industry standard ADA compliance.
- Interacting with team members as well as clients to provide technical support.

Covered Security — *Software Engineering Intern*

MAY 2018 - DECEMBER 2018

- Played a key role in Front-End infrastructure and design.
- Converted static web pages to Angular 6 application components in the midst of a redesign.
- Was held accountable for every new component and feature to be unit tested with Nightwatch.js.
- Experience with AWS platform and its offerings, such as elastic beanstalk, DynamoDB, and S3.

Simply Business — *Software Engineering Intern*

JANUARY 2018 - MAY 2018

- Was in charge of managing documentation for the company's onboarding process as well as other nuances including but not limited to Github repositories, coding standards, project set up, etc.
- Contributed and launched several company products using Ruby for templating on the company's corporate website, and also custom CMS.
- Led development on an employee email signature web app to benefit and cut time between company-client relations, as well as to improve employee emails and overall boosting the aesthetic.
